This was the time that seemed to work best for most of the invitees. I will repost the questions.

To assist OECA in issuing a stop, sale, use, or removal order, we need a responses from OPP on the following questions.

1. If EPA were to decide to register Anvil 10+10 today, knowing what it knows about PFAS levels and the probable effect of treated HDPE containers, as compared to the current registration, would there be any different measures imposed to account for, reduce, or to mitigate the effect or presence of these PFAS contaminants in the Anvil product? Specifically, would there be:
 - a. Any different conditions for registration?
 - b. Any changes in the product's labeling (beyond the label)?
 - c. Any difference in the product label (directions for use, precautionary statements, storage or disposal methods, etc.)?
